

Fulton Ramp Ends

Fulton® provides a convenient way to turn ordinary 2" X 8" lumber into custom loading ramps. RE8T is a pair of top plate ramp ends constructed of heavy-duty zinc plated steel. Just cut your board to length, mount the ramp ends, and you're ready to easily load & unload cargo. Mounting hardware and instructions are included.

Fulton Aluminum Ramps

- Made from High Strength Aluminum Alloy, these strong & durable ramps can support many different pieces of equipment, yet they are light-weight and rust resistant.
- The Patented top plate is angled to assure a smooth transition between ramp & bed, resulting in easier loading.
- The adjustable straps ensure safety, keeping the ramps securely strapped to the truck.
- With a push button release on the straps, they can be quickly adjusted to fit. The push button design quickly loosens and tightens the straps.

Trailer Tailgate Lift Assist System

The Gorilla-Lift is the next generation of utility trailer tailgate lift assists. The Gorilla-Lift...

- Is a two-sided tailgate assist; it attaches to both side rails. This prevents very heavy tailgates from warping or the hinges from deteriorating prematurely from uneven stress.
- Takes 100% of the weight off most trailer tailgates.
- Works on open utility trailers with side rails 10" to 24" inches tall.
- Works on open utility trailers with tailgates 4 to 6 feet tall.
- Works on trailers with square tube, round tube, or angle side rails.
- Attaches to your trailer quickly and easily.
- Has a one-year limited warranty.

Ramp Springs

Manufactured with a high quality steel alloy, these Ramp Springs provide approximately 90 degrees of deflection.

PART NO.	REF. NO.	DESCRIPTION
RS16933LH	385700	RAMP SPRING, LH 2K TORQUE FOR 1 1/2" SHAFT
RS16933RH	385705	RAMP SPRING, RH 2K TORQUE FOR 1 1/2" SHAFT

Enclosed Trailer Ramp Springs

M-3

Each Ramp Door Spring is a complete system, designed for enclosed (cargo and specialty) trailers, and includes everything necessary for proper installation, except mounting bolts. The system features a dual drum and dual cable to prevent the ramp door from free falling in the event one cable is accidentally cut. The universal mounting bracket has two 3/8" holes that allow the installer to bolt to the rear header or the bracket can be welded. The four part numbers offered cover a majority of enclosed trailers, but custom assemblies are also available for finished door weights ranging from 50 lbs. to 300 lbs. The system is warranted for three years against defects in material and/or workmanship.

PART NO.	REF NO.	SPRING TYPE	TUBE LENGTH	CAPACITY	PACKAGE

ERS80S96	385670	SINGLE SPRING	96"	80 LBS.	BOXED
ERS80S66	385680	SINGLE SPRING	66"	80 LBS.	BOXED

Towing Mirror

This durable all black Towing Mirror is fully adjustable and fits most standard OEM mirrors. The jointed extension arms adapt to the desired angle or shape, and the mirror head pivots on a ball so it can be used either vertically or horizontally. Easily installed with no tools; just clip the mirror on and cinch up straps until they are tight. When mirror is not in use it is collapsible, so it takes up very little storage space.
