

Underbody Toolboxes

- Powder coat finish passes 500-hour salt spray exposure testing.
- Leak-free continuous weather seal in door frame area; others with multiple piece seals may leak.
- Ultra-reliable T-handle locks seal every time and cannot be easily vandalized. Paddle latches used on other toolboxes do not always latch on the proper catch, causing leaks, and they can easily be pried open with a crowbar.
- Stainless steel continuous hinge is designed for years of hard service.

Poly Trailer Tongue Toolbox

Made of durable composite material, this rust free box will maintain a neat, clean appearance; an attractive addition to any trailer. Built of high-density polyethylene, its weather-resistant design keeps moisture and the elements away from box contents. The top of the box and bottom of the lid interlock (tongue & groove) for improved water/dust resistance.

The back of the box can be mounted directly against the front wall of a trailer, with the lid opening up to a full upright position. The integrated hinge design positions the rear of the box lid 1-1/4" in front of the back edge of the tongue box.

This full-size A-Frame design box is large enough to hold lots of cargo; box size will even accommodate our Colt Hoist hydraulic-pump power unit and battery for dump trailers! Outside box dimensions are: 14" tall, 20" deep, 35.5" wide. The box can be locked for cargo security, which discourages theft and/or tampering of tongue box contents. A padlock-hasp latch is integrated into box front. (Lock not included.)

This economical cargo control accessory can be used on virtually any type of trailer and it provides multiple sales opportunities for OEMs and Dealers of utility, cargo, marine (PWC) and dump trailers.

The Poly Tongue Box is priced at approximately half the cost of our comparably sized steel A-Frame tongue boxes.

Trailer Tarping Systems

- Universal hand crank tarping system, designed for quick/convenient tarping of loads.
- Pre-assembled, adjustable roller assembly fits trailers up to 101" wide.
- User-friendly bolt-on or weld-on installation.
- Extruded aluminum roller features a tarp spline groove for positive tarp attachment.
- Convenient, foldaway crank handle locks the tarp/roller in any position, (fully extended, fully retracted or anywhere in-between).
- 80" x 14 ft. tarps, in solid or mesh versions, fit most trailers - special sizes available.
- An ideal addition to any dump trailer, landscaping trailer, etc.
